Welcome....

1

Thank you for taking the time to discover why Deps may be the right company for you to work with on your next important project or supply needs.

Hello! My name is Victor Little, CEO of DEPS what is now considered Australian's #1 Manufacturer and supplier of specialized pipe, Casing & Screens, Fabrication and Slotting, Threading and Perforation of pipes, Deps P/L. We have been in business almost 20 years and have built a solid reputation worldwide for the manufacture and delivery of high quality products to the drilling and mining, civil and plumbing industry.

We understand the consequences of downtime in this business. That is why we provide the fastest turnaround and delivery time possible with our legendary customer service. Wherever you are in the world, you can rely on DEPS. What's more, all our products come with our iron-clad, "No Holes" guarantee after being subjected to our stringent quality control.

As you read through this information you will learn all about Deps and how it can help you deliver your project or supplies on time and within budget.

Deps is not for everyone and does not want to work with everyone, when you have read Discover our Why and taken the test in section 5, this will show if Deps is right for you. If it's not that's fine and we will part with no ill feelings.

There are many aspects of Deps that are not seen in other suppliers, this is what makes us special and by producing this book for you so you can learn what makes Deps tick and special, but more importantly are we right for you and how can you benefit from using Deps.

After being in business for this period of time we have discovered one extremely important fact that people like yourself demand
"We want it now"

Armed with this information we have designed our core production center around this information. On most days we are underutilized, but when you put in a extremely important and urgent order we can press the go button and increase our utilization of machines and produce your product and meet the time frame agreed upon.

Now it's time to please sit down and grab a coffee or a tea so you can find out for yourself if Deps can help you.

The Chronicle....

A National Supplier Delivering Economic Piping solutions On time "Guaranteed"

I wanted to take a few moments of your time to explain with you about how we can assist you in completing your project or specialized piping needs on time and within budget.

As a business owner, Manager, Purchasing officer or CEO I understand that one of the greatest difficulties for on-site projects in Australia and all around the Globe, have and always will be their site remoteness and the slow reaction time of businesses that supply them with essential products in an unacceptable time frame.....creating massive losses of time and production!

And never mind the headache it causes you.

DEPS - Quality, Deliverability, Specialized Piping Products for nearly 20 Years

This is why DEPS was established back in 1993, to offer specialized piping solutions and components so busy project managers and business people like yourself can get on with the task in hand and not to worry about the delivery of your ordered components.

As a major supplier in the Drilling, Irrigation, Environmental, Civil & Plumbing sector, DEPS entire operation has been created to ensure real cost savings for you in terms of:-

You'll discover they we have a super quick reaction time to starting your Project.

You'll come to know us for our capability to perform specialized slotting to meet specific requirements - for any project at the drop of a hat!

You'll take great comfort in knowing that we address your needs promptly, organize your deliveries.... and guarantee our delivery times!

We are capable of designing pipe jointing methods to suit your application!

We offer an amazing 50-100 year life span assurance on the quality and durability of our PVC!

When your project is top priority to you, it becomes a top priority to us.

The thing is when it is your aim to become the No.1 manufacturer for all the above industries you need to keep constantly in touch with the Clients' need..... and our aim has been to find out what products are needed and manufacture them to meet those needs.

This is why Deps has grown since 1993 to become Australia's #1 for reputation of quality products and delivering on time as many of our clients have repeatedly been impressed by our service and made comment regarding our prompt job starts, ongoing service and communication even after your project is complete.

We do it for You!

Right now our manufacturing and storage facilities are in South East Victoria, there are 3 separate buildings that each have their own specialist area, this is done to create the most efficient capabilities as possible allowing Deps to finish your order or delivery on time.

Deps has designed and manufactured all of its own special manufacturing machines to ensure they produce your components to the highest quality on time and will guarantee that repeatability will be exact no matter how many components are needed.

When you choose Deps you will be joining an exclusive group of National and International Suppliers, drillers, civil and project companies including 1929 Clients from numerous companies such as Western Mining Group, Idam, BHP, Vinidex, Total Eden, Tyco, Drillers World, ENSA, AIS, Islex, ENSA, DTH, Heggies and several other leaders in your sector.

Delivering on time is guaranteed.

Let me create a scenario for you - one that's all too often a frustrating reality for operators in the drilling, mining and Civil Industry.

Just imagine your client is miles away from anywhere working with a tired crew that's put in a hard day's work on site when something goes terribly wrong.

I'm sure you're more than familiar with is.....

Their crew really just wants to get home, get cleaned up, relax and have a long nice cold beer to wash the dust away - they've been dreaming and talking about it all-day.....

But then the unthinkable happens and a pipe breaks or these some missing that requires special threading and slotting, you get the phone call and you know there's no way in the world you've got one ready to replace it.

Suddenly that nice, cold, thirst-quenching beer they were thinking about seems like a distant possibility and the frustration sets in. Worst part is you have to solve the problem immediately or else there's going to be a whole lot of ramifications - causing lost time and money.

The problem is.....

How do you solve this one without any fuss immediately?

How do you find someone that's prepared to guarantee that they will deliver it on time every time or they'll pay you?

Well look! If you're customers are in the drilling, Civil or mining business and you want drilling or piping supplies that are top quality, guaranteed every time... and turn up when you need them most and your sick and tired of dealing with suppliers that let you down then your life just got a whole lot easier.

DEPS Specially designed automatic slotter

**DEPS
Ace
Lathe.**

Well the GOOD NEWS is with the benefit of my experience.....

You too can be confident in knowing DEPS will deliver exactly what you need for your client on-site with its specific manufacturing capabilities no matter where you or your customer are.

And it's not a dream or some sort of airy-fairy wishful thinking. You'll soon realize that by simply using my second to none, one-stop service for all your customers in the field problems of being stuck and stressed while waiting around for parts and products will be a thing of the past!

When something happens on-site.... no matter where you are.... count on DEPS to knock the worry and time lag out of putting things right with their incredible commitment and service.....

Where you'll discover they have a super quick reaction time to starting your project!

Where you'll soon realize "DEPS" delivers highly competitive, top quality, economic piping solutions!

Where the extensive range of pipes and threads will surprise you PLUS: the largest selection of materials on the market today!

Where you'll come to know us for our capability to perform specialized slotting to meet specific requirements - for any project at the drop of a hat!

Where you'll find our machined threads meet world standards!

Where you'll take great comfort in knowing that we address your needs promptly, organize your deliveries.... and guarantee our delivery times!

Where we provide the perfect solutions for your drainage problems with the highest quality drainpipes!

Where we are capable of designing pipe jointing methods to suit your application!

Where we fabricate products in plastic for longer life!

Where you'll pleasantly discover how we are only too happy to work with your designers to design items at a more economical cost for you!

Where you'll see how we can help protect your groundwater from contaminants!

Where you'll discover our products are chemical resistant!

Where you'll soon realize our PVC is non-leaching!

Where at last: you find a company that is prepared to do machine jobs that no one else in the world can do!

Where you'll discover pipes with a long life span - meaning lower maintenance costs and lower replacement costs to you!

Where you'll realize we can slot vertically, horizontally, round or do a mixture of both!

Where you can feel comfortable in knowing you're dealing with a company that been around for over 20 years and is a member of the "Australian Drilling Industry Association" (ADIA)!

Where you'll be covered by our "No Holes" nonsense 100% Guarantee which simply means if what you order is not what you received we'll pick it up and replace it or give you a full refund on the product

In this package you will find a summary of nearly 20 years in the drilling & civil Industry.

This package has been designed so every question you have will be answered regarding our unique products, In the unlikely event that these are not answered to your satisfaction then please contact Deps directly and one of our professional staff will answer your question.

If you're interested in experiencing our product, services or learning what we have to offer you, then at your earliest convenience, I ask you to give this package the attention it deserves.

So please take a few moments and go through this package as you will find it informative and interesting as it will give you a insight on how we can help your business and your projects be easier to manage and be more efficient.

Experience what it's like to have that extra piece of mind when you're customer is on-site, and you know you've got a supply manufacturing company like DEPS that intimately knows your industry and how to solve their problems fast when they occur..... ENJOY the DIFFERENCE!

I'm looking forward to welcoming you as my new and valued client.

Warm Regards,

Victor Little

Deps has a lifelong connection to manufacturing and believes in delivering quality products to those who are in need of standard or highly specialized products, with its unique experience we can help you to create and deliver the product that ensures your project succeeds and within your time frame.

Our beliefs are firmly grounded and have been embedded over a long period of time. Our words and promises are exactly that, this is why we can guarantee our products and services.

We are a leader in our sector we have the highest integrity and commitment to succeed, we demonstrate a duty of care, plus inspire change while maintaining an enjoyable and easy relationship.

Why People Deal with Deps.. 12

Here Are 7 Compelling Reasons to Choose

"DEPS" with a reputation for efficiency and quality service to the drilling, mining, civil plumbing industry for over 20 years.... RIGHT NOW!

Compelling Reason #1: We take on the difficult jobs that other companies won't touch!

One client could not find anyone else to take the job on, they finally found us and the job was completed.

Not only are we possibly the largest company of its kind in the world and the first to use PVC as bore casing and screening.... we have stepped outside our comfort zone to deliver our clients what they want.

The reason we are capable of doing this is because of our "manufacturing resource planning" (MRP) has allowed us to create innovative designs like the taper lock joint that is used in "horizontal directional drilling" (HDD).

Compelling Reason #2: The jobs we have won have been decided on our all round ability to meet certain demands! So far we have supplied products to suppliers in places like All states in Australia, Fiji, New Zealand, Indonesia, Singapore, China and New Caledonia to name a few....

Case Study #4:

"PT Freeport Indonesia" is the largest Gold mine in the world and they chose to use "DEPS" for their special needs. One of the specialist needs that they had was to slot steel pipe in the same form as PVC. Well after searching the world they finally found "DEPS." We have been manufacturing this special product for them for over 7 years and still the orders are coming in. Being such a large organization their controls for handling overseas orders are very stringent and we have been told

Case Study #4 Continued:

that if our packaging and paper work is not 100% as they demand the goods will not be excepted and we will be up for the costs. To this point our team at DEPS has maintained a 100% efficiency in this area.

Case Study #5:

We got a phone call from John of Iplex Export Division stating that he was told we were the people to deal with concerning a large project he had in one of the third world countries. He needed Stainless casing and screens, as well as PVC casing and other special; bore needs, even though he had companies around the corner from him to manufacture these items. We were chosen and awarded the contract and this was a special project indeed as we had to get a large amount of 10inch cast stainless rings and machine our PVC course thread in them. This was no easy task but with our specialist machinist's the task was completed. After working on this project we packed it in containers and sent it off overseas to join the rest of the shipment. After completing this project we worked with John winning many other contracts for overseas and UNICEF.

Compelling Reason #3: Cutting edge ideas!

Imagine for a minute! You have just been contacted and told that there next hole is a whopper using 50mm Borecasing and screen. Flashing in your mind is the picture of yourself screwing all these pipes together, but what choice do you have, you drill the hole and start threading the pipes together one at a time it seems to take forever turning, turning and turning until it's together and then there's the next one.

With you in mind our team has developed a two start thread for 50mm Borecasing and screens that is capable of being joined in a fraction of the time taken previously.

In actual fact, it is nearly 10 times quicker!

What we came up with was a dual start thread that instead of nearly 5 turns before the joint is tight can now be done in nearly 1/2 a turn. This saves you a lot of time and repetitious threading action.

The benefits to you are.....

Less time in joining pipes.

Max thread strength is immediate.

Repetitious tasks are reduced.

Allows you to get to the next project quicker.

There has been many special thread joints, pipe fabrication or threading and slotting that have been designed and manufactured by Deps to meet a supplier's demand. So if you have a special requirement then we will be happy to discuss what needs to be done to for fill your client's demands.

Compelling Reason #4: Only the highest Quality materials supplied....

Only UPVC virgin material meeting AS1477 is used.

Because we know you're going to benefit greatly from the high quality we provide.

With some manufacturers and importers of Pvc pipe how would you know that it meets the minimum bore standards which you are required to work to when drilling bore holes, Many councils have also banned non MPVC in any of their projects.

So don't get caught by using a product that cannot be verified to meet the standards in every batch.

DEPS can meet those standards so your quality record will stand.

Use the drop test to check your pipe

Compelling Reason #5: Iron clad No Holes Guarantee! If my work doesn't leave you completely happy and satisfied!

Your Satisfaction Is Completely Guaranteed!

"My Powerful RISK IS ON ME,
Iron clad No Holes Guarantee "

No One that supplies the mining, drilling & Civil Industry
All Around the World Is Prepared To Promise Their
Reliability.... But I Do!

Compelling Reason #6: Any size any Slots available

Being manufactured and supplied direct from the manufacture allows Deps to meet your exact requirements, any size pipe, any length, any joining method and any slot pattern.

With Deps specialized manufacturing machines allows us to be able to machine to your specific needs.

Your exact requirements can be completely Guaranteed!

If you require vertical, Horizontal or round slots then Deps can supply your pipe with any of these slot patterns, no one else in Australia has this facility.

That is why Deps is #1 in Australia for bore screen and casing

Compelling Reason #7: Australia's #1 wouldn't you want the best?

Australia's #1 Manufacturer & Supplier Of Specialized Pipe Fabrication Screens & Casing.

PLUS: Other Drilling Supplies is Leading the Field With it's Strong Capability To Meet the Time Sensitive Demands Of Today's Industries.... In Every Corner of the Planet.

Why using a company that has over 20 years experience in pipe joining methods and screening systems is The BEST Way To Quickly and Easily solve any problems.... and on the spot decisions that may hit you on-site unexpectedly - and So Much More.

Who Depends on Deps....

18

Who Deps Services are Perfect for:

Discover the Businesses who prospered by experiencing getting rid of those purchasing headaches when the use Deps.

Suppliers Australian & International

Why? Because Deps understands that you need to uphold your strong relationship with your customers, supply the goods when needed and produce a profit, which keeps the business strong.

Drillers Who's office is their Drilling Rig

Why? Because Deps understands that you and your clients constantly work 100's of miles from home, your office is sometimes the front seat of the car or truck and your only communication is the mobile phone. You need to finish this project and get back home so you can all see their family. With little time and tight deadlines to keep, Delivery of components needed is essential to getting home on time.

Environmental Drillers

Why? Because as a driller working with a drilling rig that now has to work in a clean environment where one spill of contaminate will create havoc with the ground contaminate readings. Deps has the equipment and the piezometer's that meet the Australian Standards, have no leaching properties to even further change the sensitive readings. They understand that an environmental bore must have clean products being installed and products that will not allow any further contaminate to touch the ground or alter readings.

Exploration and Mining Drillers

Why? Because when the sweat is dripping off you and it's over 100 degrees and every breath of air is hot mixed with red dust and it feels like your lungs are on fire, you don't want to be standing around outside in the sun any longer than you need to.

Being paid per Metre drilled - every extra Metre is money you get paid for quicker, you do not need a drilling rig on standby just because you are waiting for a delivery

Environmental Consultants

Why? Because when you are quoting on the next environmental project and a design engineer has asked for the bore screen to be a specific diameter with a specialized slotting pattern, they have somewhere to turn to and receive a quote quickly and meet their specific requirements.

Plus pricing and availability on all other standard products needed such as 50mm piezometers, with Deps handling that side of the project another headache is removed.

Project Managers

Why? Because they realize that when the project comes to a standstill, expensive staff and equipment are idle costing 1000's of dollars caused by a supplier not delivering on time.

Because they use Deps this problem has been ratified and they get on with the job of managing the project, not madly chasing the supplier.

Purchasing Officers

Why? Because they realize that it is not all about the price, spending a few dollars more they get the best products with great delivery times and quality that will create a show case for the completed project. Having the project finished on time with a completely satisfied customer puts them in the box seat for the next project and the latest project completed on time, on budget with fewer pains.

So by using Deps there may be a slightly higher price sometimes but the paybacks are greater.

Consultants

Why? Because they have a need to come up with a better way and the most efficient design for the project at hand.

Why use a standard component when a specific purpose designed unit is more efficient for the outcome of the project. Deps can machine and help design the right piping solution to meet their needs.

Civil Engineers

Why? Because every project they do is different and therefore the items needed are often specialized for each project.

When it comes to water movement then Deps has a piping solution that will match their specialized requirements

Plumbers

Why? Because not only does Deps supply pipe and fittings but Deps can slot the drainage pipe to suit their requirements, Vertical or horizontal slots.

This can be in various sizes or slotting patterns

Dewatering Specialists

Why? Because when water is stopping the building project and the earth works are at a standstill, the quicker the water is pumped away.

The quicker the ground conditions can be stabilized so faster the project will come on track to be completed on time, as these types of projects are often the groundwork needed, before the building projects starts.

Deps manufactures the casing and screen needed to maximize the pumping efficiencies ensuring the project starts on time.

Get Qualified....

Do you need Drilling, Environmental, Civil, Plumbing or Mining supplies as offered by Deps delivered on time as Deps promises?

What you need to ask yourself is this....

	Toddays Immediate Needs	Yes	No	Maybe
1	Do you want to deal with a company that is the first to use PVC bore casing and screens in Australia.... and as far as i know internationally?			
2	Do you want to deal with a company that has the largest capacity to supply anyone in Australia and Overseas?			
3	Are you sick of waiting for your order to be delivered?			
4	Are you purchasing supplies monthly or more?			
5	Do you know exactly what it will cost delivered?			
6	Do you need machined PVC products that you could not get anyone else anywhere on the planet to do?			
7	Are you sick of your business time taken up by looking for a particular item?			
8	Do you value and are you preapred to pay for a superior service?			
9	You buy only at the lowest price not knowing what type of service yu will get?			

If you are looking into the future for supplies? What do you need to ask yourself?

	Your Future Needs	Yes	No	Maybe
1	Would you be more likely to purchase products if the purchasing system was made easier for you?			
2	Are you interested in completing your project on time or even early?			
3	Will removing headached by having no supply problems interest you?			
4	Would you like to have a fully costed delivery schedule for you next project?			
5	Does turning up on site and having all your supply needs waiting on a pallet on site for you to start, interest you?			
6	Having the exact speacilized product needed avaiable at a price?			

If you answered No or May Be to more than 3 of the first set of 8 questions, then at this point in time Deps services and products are not for you at this point in time.

We thank you for looking at potentially using our services and we hope that in the future you will see the benefits of using Deps.

In the second set of questions looking into the future if you answered yes to 2 or more of the questions then you are in need of Deps services to work with you on your next project be delivered on time.

If you need your piping solutions delivered on time then you need to contact Deps so we can start the process as soon as possible.

If the above resonates with you and you can see the benefits by dealing with the #1 supplier then don't waste any more time and contact us now by phoning 1300 133 000 or see contact details

This could be your best business decision.

Delivered on Time... Guaranteed, piping solutions to meet your specific needs, Mining supplies, Drilling Supplies, Civil & Plumbing Supplies Helping you keeping your project on time and Budget, Getting you home quicker. This is why people are talking about Deps service.

Deps Process-

Being in the Industry for many years we understand that you are incredible busy and are always working under strict time frames and budgets, this is why everything we do and plan is involved around making your life simpler no matter where your project is.

If you are still asking yourself is Deps services right for me, then this is understandable, so we are going to let you know exactly what will happen in our process and what you can expect.

Step 1A: Your Telephone Call

1300 133 000

As soon as the telephone is picked up by us you will hear "good morning welcome to Deps , Brooke speaking, how may we help you?" Our team have been trained in making sure that that your politeness expectations are met.

When enquiring about our products some of the typical questions you will be asked are -

What size

Length

Material type

Joining method

Slot size

What special requirements are needed?

Delivery date

When all the information has been obtained our trained staff will evaluate if there is a more efficient method or product available for your piping and mining solutions.

Step 1B : Your Fax Sent / Email

03 5941 4148 / sales@deps.com.au

As soon as it is received action will be taken and processed, if there is any points in which our sales team are not 100% clear on, they will contact you immediately and ask the appropriate question, Contact will be the most convenient method you have supplied.

Step 2 : Your quote

All details will be entered in our Customer Relationship Management "CRM" program and a detailed quote will be processed with a delivery date if needed.

This will be sent out to you via fax, email or phone which is the most appropriate for you.

Step 3 : Your order acceptance

Once you have agreed with the quote and are happy with our process an order with an order number can be sent by email, fax, sms, or post.

Step 4 : Your Order process

Our team will process your order and create a internal order or manufacturing bill using our manufacturing resource planning software "MRP" this is sent to the workshop to be manufactured or packed.

Once this process is finished the inspector will check the items to ensure they are they same as the order and sign off the paperwork and send this back to the office for the next process.

Step 5 : Your Order completed.

The Office staff will now create an invoice on our accounting package "MYOB" and print the delivery docket which will be attached to your goods. And the invoice will be sent in the mail or emailed to the appropriate person.

Step 6 : Your Notification of Completed Order

You will be contacted to inform that your goods are ready to be picked up or your goods have left, if we have not been informed of transport methods we will contact you to arrange the method of transport you require. Once this information is required we will contact the suitable transport company for pick up.

All delivery documents are kept and filed and a running sheet is signed for you so that pick up by whom can be verified.

Step 7 : Payment

Before goods are delivered payment will be necessary as our products are COD unless you have filled out the account application form and been granted an 30 day only account

We accept, Cheques, Bank transfers, Cash and Credit cards, accepted cards are Visa, Master, Amex and EFTPOS.

Step 8 : Your Delivery

Once the above payment methods are complete then your project supplies will be sent on its way by the method that you have chosen or we can arrange the transport through one of our transport companies that we use.

You can see that the above process and systems we have in place are to ensure that your products are to the quality you expect and meet your delivery requirements; the system is designed to remove your headaches and let you get on with your job.

Once you compare our service you will see why Deps (#1 Supplier) has become they preferred supplier by many of the leading project businesses in a Australia and around the globe

If you can see the benefits that you and your business will receive by using the #1 supplier Deps then call or contact us.

PS. You would like to place an order at any time convenient to you then you can use our online site which was designed for clients who are on the move at any given time.

Log onto www.deps.com.au click on the picture at the bottom of the screen or any link on the products page and create an account today.

We have also set up a mobile friendly site at www.deps.mobi

Some Testimonials from our Clients:

"ORESOME,
ONCE AGAIN THX FOR YOUR PROMPT AND PROFESSIONAL
SERVICE"

Kind Regards

Louie Trow - Kalgoorlie Case and Drill

"Thank you. Top work., Wow! Fabulous work. Boy you are fast!
Many thanks,"

Regards

Robin Munroe

Technical Sales - Water Well - Johnson Screens

"As always, it is always a pleasure working with you guys at Deps, What else can I say? We think that our client/supplier experiences speak volumes about you and your team's talent and abilities. We're very fortunate to have you guys on our side! Thanks again for all your help and support. Your super quick responsiveness and superb follow-up kept us on track for a flawless execution. You all are truly amazing people, professionally and personally, and do such terrific work for us."

Bruno Ciotti - Pipemakers (Victoria)

Thanks for your prompt service"

Kevin Sneyd - A.G. Drilling (NT)

"Victor and his team at DEPS have been providing us with quality PVC screens and casings for a number of years now. No matter the request, it has always been met with a 'can do' attitude. Whatever your requirements maybe, you can be sure that DEPS will work with you from the start to finish of your project, and beyond"

Adrian - Plastic Plumbing - Victoria

"Great Product, Great Price, Great Service.
Ring them in the morning and they get it delivered straight away for us
Too Good, Thanks Deps"

Grant Rumble - Attack drilling

"I know I can get it done cheaper else were but my neck is on the line and I need to sleep at night with this job as it is so important, therefore I need you to do this job as I know that it will be done properly, as you have a great reputation out there."

Mick - Idam - South Austrlia

"We are extremely satisfied with the high level of service we have received from DEPS. The quality of the goods to date have been flawless. Time frames for production have been spot on, especially when we pushed to get the container of 50mm ND produced within 10 days. From our 4 year history of trading with many international suppliers around the globe it is a great relief to have worked with DEPS."

"We would be more than happy to recommend your products and services to any company that requires a high level of professional service, quality of goods, back up support, consultation and accountability."

**Kind Regards,
Vince Sullivan - Managing Director**

Why settle for anything less than the highest standards set by one of the world's leading suppliers to the mining industry today?

With our brilliance for delivery and reliability in getting no job too big or too small done on time every time.... and our cutting edged skills to keep things on track.... and you'll find you really don't have to put up with the run of the mill frustration that comes with mining in remote areas.

You'll find when you come to DEPS there's....

No need to - worry about wasting time because the products not right!

No need to - worry and stress about sitting around waiting for what you've ordered to turn up on time

No jobs too big, too hard or too difficult because we are used to stepping outside our comfort zone!

No need to feel out in the cold because we'll deliver what you want to wherever you are promptly!

And what's even better, the difference you'll notice when you use our services to supply your needs it will be extremely noticeable.... with no effort on your behalf. **We do it for you!**

There is absolutely no reason why you shouldn't insist on the best possible service available to you when it comes to mining supplies that are perfectly manufactured to meet you requirements.

P.S. Remember, my delivery times are fully guaranteed. You never risk a cent on the quality of my products and if it's not there on time I'll pay you \$200 for every day it's late on arrival That's how confident I am in delivering you excellent service that we stand by, it's that simple!

7 Great Reasons why you should call Deps Today.

1. Because we GUARANTEE your delivery time, it's far easier for you to plan your projects ahead.
See our "Iron glad no holes guarantee"
2. We'll give you a guaranteed fixed price for any piping or product requirements before you start your project...
So there's no nasty surprises when the products are delivered.
3. Because we GUARANTEE all our Piping and products 100%.
4. We take on the difficult jobs that other companies won't touch
5. All our pipe is UPVC and meets AS1477.
6. Our manufacturing and warehouse facilities are ready for your next tight time frame project order RIGHT NOW!
7. Because Delivering Economic Piping solutions are DEPS speciality.

Q: What size Pipe do you sell?

We can supply pipe from 12mm to 1000mm Dia.

Q: What sizes does your threaded casing come in?

We can supply threaded casing in sizes from 15mm to 500mm and lengths up to 6M, we can slot pipe up to 710mm dia. In 6m lengths. Pipe sizes up to 350mm can be slotted in 12m lengths if needed, but this length does add freight problems in small numbers so we recommended 6m lengths as Std.

Q: what slot sizes, Lengths and patterns can we do?

Our slot sizes and patterns are created by your needs but we do have a standard range these are:

Blade widths: **0.2mm to 3mm Std.**

Spacing's: **2mm to 10mm are Std**

Types: **Horizontal, Vertical Slots and Hole Patterns**

Standard patterns are 50mm 3 rows 0.5mm slots with 7mm spacing 80-300mm dia. 0.8mm slots with 10mm spacing horizontal cut and the number of rows depend on the pipe size.

We can slot any length from 1M to 12M lengths of pipe.

Vertical slots are machined in mainly drainage collection type pipes, such as 90mm slotted drain pipe, slot patterns are usually 4 rows 4mm slots 500mm pitch.

Many of our clients have specific needs so we have designed our machines to be able to be set up to meet your slotting requirements.

Q: What type of threading and jointing systems do you have?

Pipes from 15mm to 500mm can be machined in our computer operated machines that have been designed specifically for machining our bore casings and pipes, over the years we have machines various jointing pipe systems, our standard thread is a square thread approx 8mm pitch and is a flush threaded right hand joint. Other jointing methods are tapered vee thread, parallel vee thread, Acme, Trapezoidal, taper lock joint, glue joint, male female taper joint, taper thread joint, Barb and a taper push on sealed joint. These can be machined to your standards that may have to be meet such as ASTM F480 and DIN 4925.

For a quick joining time we have designed our special 2 start quick join thread, this helps you by saving the time in screwing it up as it now only takes half the time.

Q: What materials can you thread and slot?

The main material that we use is **UPVC** pipe that is made to **AS1477** and guarantees that it is only made from virgin material and no regrind.

ABS is also commonly used in deeper bores and where more chemical resistance is needed.

Where there is a potential for Hydro carbons to be in existence, HDPE is a good material to be used, but you have to be aware that it floats. Not very good for bores, but where grouted properly no problem should occur.

Poly Prop can also be machined.

Steel and Stainless pipe is often threaded regularly in our workshop and has also been slotted.

Q: How soon can we deliver?

Many of our standard products we keep in stock and we can deliver the next day, for a special client's order we try to keep the delivery time to under a week but on many occasions we deliver the next day. Our larger projects where there are 1000's of pipe take 3 to 8 weeks delivery. But we do have our "Iron Clad No holes Guarantee" For our delivery times.

Q: Do we have it in stock?

You will need to contact our production department to be given precise information, click on our contact button below or on this link
