Stainless Steel Turbine Pump Column

After only 6 years there are holes appearing in your pump column, by replacing it with stainless column you should never have to worry about it again. In most cases the cost of the replacement column is only double the cost of steel, with it outlasting steel by more than 10 times, the pay back period is relatively quick.

Bronze Discharge Column Flange and Stainless Column with a bronze joiner

Easy Drill

Released for the Market Now

Need to Drill Horizontal? You have a Excavator, then the Easy Drill may be the machine that suits your requirements. It's a small machine that packs the power of a machine much larger.

Why spend hundreds of thousands of dollars when you can purchase a Easy Drill for under \$100,000

Capabilities - 3628 kg of Thrust 4764 kg of Pull back 360 Deg Launch Angle (No other machine has this.)

Will fit into the smallest pit.

Who uses this machine?

This simple to use machine was decsigned for anyone who is in the HDD Market.

Where this machine really stands out is in the area of Fibre optic Broadband, Electricity cable laying, gas pipes and drainage. Specially where these facilities need to be installed in Suburbia where there is little room for large machines and huge pits needed to be dug.

Solving your Piping, Drilling and Drainage Challenges with Trust and Integrity
